## The Introduction of Dung Qun Industry Co., Ltd.

Dung Qun Industrial Co., Ltd. is one of the most famous plastic product manufacturers in Taiwan, especially in the field of sporting goods and athletic equipment and kids' physical educational and training kits and goods. As a manufacturer of plastic goods, we already have more than 20-year of experience.

Our customers are always satisfied with our products and services.

Our founder, Mr. Chi Hung Chen, set up Yuan Tai Industrial CO. in 1997 first to do domestic business. With the business growing, Dung Qun Industrial Co. was established to pioneer the oversea markets in 2010.

After 10-year efforts and good performance, Dung Qun finally and successfully applied to set up a brand-new factory at Tree Valley Park of Tainan Science Park, to start operating in 2020. The most famous Semiconductor company, Taiwan Semiconductor Manufacturing Company (TSMC), also is located at this park. Any factory in this Science Park has to follow many rules and requirements to protect the environment, such as the building structure of factories, the reusing and recycling of water, and the control of air and water pollution, and even labors' right and protection.

Our advantages are creative R&D capability, competitive price, delivery on time, the automatic production and all products are made in Taiwan. Please link to our website (<http://dungqun.com>) to see the video of our company's brief introduction.

Due to we use the automatic mechanical arm to pick up the goods as products are finished by injection machine and also adopt the auto-master batching machine to precisely blend the color of products, we not only reduce the labor cost and the work loading of labors, and even improve the products' quality and production efficiency, and offer a better working environment for our employees.

In addition, the whole producing procedure from molding manufacturing, products' injection production, LOGO printing, and packing are completed in our company, except some non-plastic products. Therefore, we can control the quality of products, offer the competitive price and variety products, and delivery on time. Moreover, with the ability to manufacture molding, we are able to develop new products every year, and also to assist our clients to design, develop, or create any products which they want in accordance with their requirements and ideas. So far, [we have more than 200 products, including 14 Taiwan patents and 4 US patents.](#)

Furthermore, we are granted ISO 9001 in 2018 and ISO 14001 in 2010, and CSR (Corporate Social Responsibility) in 2022.

Although we are not a big company, but we are still growing. We always do our best to offer our clients high quality products, satisfactory services and competitive prices.

In recent years, climate change has become more and more serious, and we have noticed the importance of green building, green manufacturing, and green supply chain. Hence, we grand them as our new mission in the future to improve the working environment of employees and protect our earth.
